TOYO INK AMERICA TACKLES INK SCUFFING AND MARKING AT GRAPH EXPO

Scuff Tuff SG Process Series Inks Provide a High-Quality, Durable Finish That Wears Well Under Adverse Conditions

ADDISON, Ill. — Nothing can spoil the effect of quality printed products more than the ink scuffing or rubbing off during shipping and handling.

Hard-drying TOYO Scuff Tuff SG Process Series inks offer a superb combination of vivid color reproduction and rub-proof characteristics on the printed page. Scuff Tuff inks are custom designed with carefully selected ingredients to dry thoroughly for maximum resistance to abrasion.

The durable finish of Scuff Tuff inks prevents marking on difficult-to-print matte, coated or uncoated stocks. The high degree of rub resistance also makes Scuff Tuff ideal for labels,

cartons, box wraps or any printed pieces that can be marred by rubbing against one another or against the sides of a shipping container.

Scuff Tuff inks are easy to manage on press. They make sharp impressions that are suitable for high-quality printing on a variety of paper finishes, such as gloss-coated stock.

TOYO INK America will feature Scuff Tuff SG Process Series inks in Booth #2406 at Graph Expo & Converting Expo 2006.
