**Toyo Ink America to Present Specialty Products at Graph Expo to Improve Pressroom
Convenience and Productivity**

ADDISON, Ill. — Finishing touches add superb value to printed materials, and Toyo Ink America (Booth #455) will showcase innovative solutions and specialty tools at Graph Expo 2007 to make print jobs spectacular and printers' lives easier. Booth visitors will see a diverse array of products designed for improved convenience and productivity at commercial, publishing, packaging and screen printing operations.

Color Management Tools

Among the many solutions that Toyo Ink America will highlight are three color management tools to help print buyers and printers avoid common design pitfalls and achieve endless creative possibilities.

The **Toyo 1050 Color Finder** is arranged on the Munsell scale in four compact, easy-to-handle books. It provides color matches for all 1,050 Toyo Ink colors. Housed in a wooden storage box, the books feature perforated sheets for efficient handling and swatch removal. The Color Finder also offers an individual formula guidebook with color chips.

The **Toyo Ink Color Chart** shows thousands of color combinations. It features two-color and three-color charts, as well as light and solid black ink application charts. In addition, the Color Chart incorporates a color tone selector and an artificial color selection scale. Clear acetate inserts can be used to isolate colors, determine readability of white copy on color backgrounds and preview line widths in color.

Toyo Ink supplies a line of commercial sheetfed inks formulated to Pantone® specifications. The **Pantone® Formula Guide** set contains 1,114 colors on coated, uncoated and matte stock. The swatch books are identifiable by the Toyo Ink cover.

TOYO KING Printing Blankets

As a leading ink manufacturer, Toyo Ink is committed to exceptional printability on press. That commitment extends to printing blankets.

Booth visitors will have an opportunity to see **TOYO KING®** series printing blankets for a range of offset printing needs. TOYO KING blankets are designed to last a long time and deliver peak performance run after run on sheetfed and web offset presses. The TOYO KING underlay system maintains consistent print height while adding compressibility where needed on the cylinder base.

Transfer Cylinder Ink-Repellant Film

Toyo Ink's anti-smear **ICP Film** repels ink from transfer cylinders to keep printed surfaces clean and smear free. The film's surface is laded with smooth, tiny glass beads that reduce contact pressure on the printed sheet and prevent marking during sheet transfer. Quick and easy to mount, the film minimizes waste sheets and saves money.

Two-Side Tape Products

Toyo Ink's **double-coated and double-faced tape** comes in 30 varieties and a range of thickness and flexibilities. Bonding uses include general purpose, high-performance, plastics, metals and electronics.

NNK Doctor Blades

SepaCera Sharp doctor blades operate durably and efficiently to ensure the highest quality that is expected from the printing process. They provide sharp, even contact with the cylinder surface and reduce the risk of blade streaking, chattering, hazing and fogging.

Ink Knives and Spatulas

In addition, booth visitors can see Toyo Ink's line of plastic **ink knives** and **spatulas**. Made of nylon 6, the knives and spatulas are lightweight and easy to use, will not scratch the ink foundation and stay clean from ink penetration.

Anti-Ink Hand Cleaner

Toyo Ink America also will feature its waterless **Anti-Ink Hand Cleaner**. These heavy-duty, multi-surface wipes clean up ink, paint, lubricants, wax, grease and adhesives.

Fortified with emollient and natural oils, they will not crack or dry hands.

Ink Anti-Skin

Toyo Ink's **Ink Anti-Skin** spray prevents skinning of oil-based offset inks on press rollers, in ink fountains or ink cans during extended print stoppages. It eliminates wash-ups with any type of ink. It is compatible with oil-based screen printing inks.

To see Toyo Ink's extensive lineup of non-ink solutions, visit Booth #455 at Graph Expo 2007, September 9-12 at Chicago's McCormick Place.

About Toyo Ink America, LLC
